PROGRAMME OVERVIEW

Train for Five Months. Then Choose Your Track.

The OPC Launchpad is a single, fully integrated Kydon programme, delivered in collaboration with Singapore Polytechnic. Training runs full-time across 8 modules and 580.5 hours, combining classroom learning with asynchronous e-learning. On graduation, you earn 8 Certificates of Completion and choose the pathway that fits your ambition.

FOUNDER

Launch Your Own OPC

Build and run your own AI-powered One Person Company, serving real clients, operating lean, and growing on your own terms. Kydon's mentorship and ecosystem remain available to support your journey.

AI SPECIALIST

Become a Professional AI Operator

Step into a fast-growing market as a qualified AI specialist, helping businesses build, deploy, and run AI-powered systems. The skills you build here are exactly what organisations are looking for right now.

8 Modules · 580.5 Hours

01 Gear Up: Essential Career Skills

43.5h

The foundation of the OPC mindset: develop the thinking patterns of an AI-leveraged operator and the on-ramp to everything that follows.

- Adopt the operator mindset and spot high-value opportunities to pursue
- Identify and automate the repetitive, low-value work in your day
- Use GenAI tools to boost everyday business productivity
- Build fluency across the core AI tools used throughout the programme

🎓 Certificate of Completion in Gear up! Essential Skills for Career Transformation and Professional Growth

02 Programming for Data Science

64h

Python programming from the ground up with a focus on data-science applications and the core professional libraries.

- Write Python from first principles for data-science tasks
- Manipulate and analyse datasets using NumPy and Pandas
- Create clear charts and plots with Matplotlib
- Work confidently with both structured and unstructured data

🎓 Certificate of Completion in Introduction to Programming for Data Science

03 Database Management Systems

72h

A working understanding of how data is stored, organised, and retrieved at scale.

- Design and query relational and non-relational databases
- Explain data-warehousing fundamentals and when to apply them
- Build ETL processes to move and transform data reliably
- Integrate data from multiple sources into a single store

🎓 Certificate of Completion in Fundamentals of Database Management Systems

04 Data Wrangling and Visualisation

76h

Take raw, messy data and transform it into clean, analysis-ready datasets and clear visualisations.

- Clean and prepare messy, raw data into analysis-ready datasets with Python
- Diagnose and resolve common data-quality issues
- Summarise and interpret data using descriptive statistics
- Communicate insights through effective visualisations with Seaborn

🎓 Certificate of Completion in From Chaos to Clarity: Data Wrangling for Analysis and Visualisation

05 Building Business Solutions with Low-Code

76h

Build the core tool of your own OPC using no-code and AI-assisted development, from setup to deployment.

- Build a working business tool using no-code and low-code platforms
- Assemble both the frontend and backend of your OPC's core tool
- Accelerate development with AI-assisted building techniques
- Deploy your solution with scalability and maintainability in mind

🎓 Certificate of Completion in Building Business Solutions with Low-Code Platforms

06 Unlocking AI

96h

The LLM engine room: reason with data and make decisions by prompting AI, culminating in a working AI brain for your OPC.

- Understand how large language models work under the hood
- Engineer effective prompts to get reliable, repeatable results
- Design AI agents that carry out multi-step tasks
- Build a RAG knowledge base grounded in your own data
- Apply AI ethically and responsibly in a business context

 Certificate of Completion in Unlocking AI: From Data to Predictions and Beyond

07 Integrating Data and AI with Low-Code

96h

Assemble the full integrated AI business engine into a single functioning system.

- Automate end-to-end workflows across your business systems
- Integrate third-party services through their APIs
- Add a GenAI layer that powers intelligent automation
- Build an operating dashboard to monitor your OPC
- Pass the Without-You Test: prove your business runs without you for 48 hours

 Certificate of Completion in Integrating Data and AI with Low-Code Development Platform

08 Leap Forward: Skills for Growth

57h

Graduate ready to step into your chosen pathway, with the narrative and readiness for the D-Day Showcase.

- Prepare your OPC for launch and sustainable growth
- Position your brand and craft a go-to-market strategy
- Make data-driven decisions with AI support
- Pitch with confidence and present at the D-Day Showcase

 Certificate of Completion in Leap Forward! Essential Skills for Career Transformation and Professional Growth

Total: 580.5 hours · 8 Certificates of Completion · Full-time over 5 months.
