PROGRAMME OVERVIEW

Train for Five Months. Then Choose Your Track.

The OPC Launchpad is a single, fully integrated Kydon programme, delivered in collaboration with Singapore Polytechnic. Training runs full-time across 8 modules and 580.5 hours, combining classroom learning with asynchronous e-learning. On graduation, you earn 8 Certificates of Completion and choose the pathway that fits your ambition.

SELF-EMPLOYED

**Entrepreneurship Track**  
Launch your own AI-powered One Person Company. Self-source and operate your own projects with ongoing Kydon mentorship.  
Goal: a revenue-generating OPC.

EMPLOYED · 6 MONTHS

**AI Operator Track**  
Join Kydon as an employed AI Operator for 6 months, operating self-sourced projects under Kydon's structure with dedicated guidance throughout.

COURSE STRUCTURE

8 Modules · 580.5 Hours

| MODULE                                                                                                                                                                                   | HOURS |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| <div>01 Gear Up: Essential Career Skills</div> <div>The foundation of the OPC mindset — identify opportunities, automate repetitive work, and use GenAI for everyday productivity.</div> | 43.5h |
| <div>02 Programming for Data Science</div> <div>Python from the ground up with the core data-science libraries, handling structured and unstructured data.</div>                         | 64h   |
| <div>03 Database Management Systems</div> <div>Relational and non-relational database design, data warehousing fundamentals, and ETL processes.</div>                                    | 72h   |
| <div>04 Data Wrangling and Visualisation</div> <div>Turn raw data into clean, analysis-ready datasets and build effective visualisations with Seaborn.</div>                             | 76h   |
| <div>05 Building Business Solutions with Low-Code</div> <div>Build the core tool of your OPC using no-code and AI-assisted development, from setup to deployment.</div>                  | 76h   |
| <div>06 Unlocking AI</div> <div>The LLM engine room — prompt engineering, agent design, and RAG knowledge base construction.</div>                                                       | 96h   |
| <div>07 Integrating Data and AI with Low-Code</div> <div>Assemble the full integrated AI business engine, culminating in the Without-You Test.</div>                                     | 96h   |

| MODULE                                                                                                                                      | HOURS      |
|---------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>08 Leap Forward: Skills for Growth</b><br>Launch readiness, brand and go-to-market, AI-assisted decision-making, and the D-Day Showcase. | <b>57h</b> |

*Total: 580.5 hours · 8 Certificates of Completion · Full-time over 5 months.*
